We're taking you back to the very beginning of the Dubstep scene with the original South London sound accurately captured across 62 presets for Serum.

Featuring the deepest subs, hypnotic wobbles, cinematic pads, melodic leads, pristine plucks, crisp claps and a range of FX covering uplifters, downlifters, sirens and more, all loaded with 4 macro controls to give you easy access to further sound design possibilities so you can really make these sounds your own.

Deep Dubstep is your go to resource and an authentic document of the birth of a genre which went from the underground clubs and pirate radio stations of the UK to become a hugely influential global scene.
