With Lofi Chill, we've put together a go-to resource of all things mellow for those after-party vibes and rainy day beats.

Featuring 50 Serum presets, 12 Cthulhu presets, loops and MIDI files, this collection will have the creativity flowing the minute you start exploring.

We took inspiration from popular Lofi, Chillwave and Ambient playlists as well as artists including Boards of Canada and Tycho to bring you this essential production toolkit.

Whether you work in genres such as Lofi, Chillout, Chillwave, Ambient or Downtempo, there's plenty of material here for you to get that laid back vibe grooving along nicely.

Each Serum preset comes fully loaded with 4 Macro controls, enabling you to tailor your sound on the fly and not distract from the production process. Featuring Basses, Drums, FX, Pads, Plucks and Synth Keys, you won't be short on some incredible sounds for a while as the scope to tweak them is almost endless!

For the Cthulhu presets, we input some of our favorite chords in all 12 keys for you to mix up to your liking, everything is in key so you don't have to worry about any awkward notes disrupting your process! You'll find triads, sixths, sevenths, ninths and more with plently of harmonic detail and jazzy flavours.

We've taken care of the theory so you can take care of making the music.

Not only that, we also included all of the loops and MIDI from the demo created by production wizard Van Derand, named according to the Serum preset used for your reference.

Level up your next chilled production with this inspiring collection!
